SUBJECT INDEX

Ab initio continuum model
Influence of polar medium on the anomeric effect. Quantum chemical study using the ab initio continuum model, 285
Alkoxycarbenes
Ab initio computation of the infrared spectra of alkoxycarbenes, 265

Bicuculline
A comparative study of the hydration effect on the conformational and electronic aspects of bicuculline and GABA, 363
Bicyclobutane radical
The bicyclobutane radical cation revisited: electronic structure and mechanism of ring inversion, 249
Bis-chelate Hg (II)
An MNDO study of mechanisms of rapid intramolecular enantiomerization of bis-chelate Hg(II) complexes, 295
BSSE problem
An analytical investigation into the BSSE problem, 43

Chemical and reaction metrics
Chemical and reaction metrics for graph-theoretical model of organic chemistry, 17
Clonidine
A molecular-orbital study of the structure–activity relationships of some imidazolidines related to clonidine, 327
Complexes
An MNDO study of mechanisms of rapid intramolecular enantiomerization of bis-chelate Hg(II) complexes, 295
Condensed state
Informative energetic structure and electronic multistability of condensed state, 125
Configuration–interaction calculations
Dense indexing scheme for limited configuration–interaction calculations with determinantal basis, 67
Cyclic π-electron system
Magnetic circular dichroism of cyclic π-electron system Part 30. Thialene and isothialene, 351

d and *f* polarization functions
Simple Gaussian-type *d* and *f* polarization functions in pseudopotential calculations, 87
D_2
MRSD-CI calculations of deuteron quadrupole coupling constants for low-lying rovibrational levels of HD and D_2 in their $X_1\Sigma_g^+$ and $B_1\Sigma_u^+$ states, 111
Dense indexing scheme
Dense indexing scheme for limited configuration–interaction calculations with determinantal basis, 67
Deuteron quadrupole coupling constants
MRSD-CI calculations of deuteron quadrupole coupling constants for low-lying rovibrational levels of HD and D_2 in their $X_1\Sigma_g^+$ and $B_1\Sigma_u^+$ states, 111
Diatomics-in-molecules study
A diatomics-in-molecules study of the reaction $N^+ + H_2 \rightarrow NH^+ + H$, 219
Dispersion and repulsion interactions
Modelling of dispersion and repulsion interactions in liquids, 157

Environmental symmetry
The environmental symmetry influence on molecular nitrogen activation, 213
Ethene ligand
Rehybridization in ethene ligand of Pt(II) in Zeise's anion, 305
Extended Hückel model
Calculation and visualization of a reactivity index for organometallics based on the extended Hückel model, 175

Finite systems
Interpolation formulae for describing size dependence of properties of finite systems and their use for clusters and biologically important molecules, 103

Fluoromethylenecyclopropane
The rearrangement of fluoromethylenecyclopropane, 311

GABA
A comparative study of the hydration effect on the conformational and electronic aspects of bicuculline and GABA, 363
Glycerylmonooleate
Theoretical studies of the conformations and interaction properties of neutral lipid molecules: glycerylmonooleate, 379
Graph-theoretical model
Chemical and reaction metrics for graph-theoretical model of organic chemistry, 17

H+DBr→HD+Br reaction
Effect of reagent rotation on the dynamics of the H+DBr→HD+Br reaction, 241
$HCN(HF)_2$
Ab initio studies on hydrogen-bonded trimers: structure and vibrational spectra of $HCN(HF)_2$ and $(HCN)_2HF$, 337
$(HCN)_2HF$
Ab initio studies on hydrogen-bonded trimers: structure and vibrational spectra of $HCN(HF)_2$ and $(HCN)_2HF$, 337
HD
MRSD-CI calculations of deuteron quadrupole coupling constants for low-lying rovibrational levels of HD and D_2 in their $X_1\Sigma_g^+$ and $B_1\Sigma_u^+$ states, 111
$He-H_2$ and $He-N_2$ potentials
An examination of the site–site representation of the $He-H_2$ and $He-N_2$ potentials, 193
Hydration effect
A comparative study of the hydration effect on the conformational and electronic aspects of bicuculline and GABA, 363

Imidazolidines
A molecular-orbital study of the structure–activity relationships of some imidazolidines related to clonidine, 327
Informative energetic structure
Informative energetic structure and electronic multistability of condensed state, 125
Infrared spectra
Ab initio computation of the infrared spectra of alkoxycarbenes, 265
Integral transformation
Integral transformation on microcomputers utilizing the spatial symmetry of localized orbitals, 93
Interpolation formulae
Interpolation formulae for describing size dependence of properties of finite systems and their use for clusters and biologically important molecules, 103
Intramolecular enantiomerization
An MNDO study of mechanisms of rapid intramolecular enantiomerization of bischelate Hg(II) complexes, 295
Inversion-reaction pathway
Quantum-chemical studies of the modification of the inversion-reaction pathway in SH_3^+ by substitution of hydrogen atoms with lithium atoms, 187

Librational motion
The model of librational motion in liquid water, 131
Lipid phase transition
Lipid phase transition and relaxation phenomena, 147
Liquid water
The model of librational motion in liquid water, 131

Maleic hydrazide
Structure and tautomerism of maleic hydrazide, 321
Methanediol decomposition
A theoretical study of the methanediol decomposition mechanism, 277
Molecular nitrogen activation
The environmental symmetry influence on molecular nitrogen activation, 213
Molecular recognition
Shape and similarity: two aspects of molecular recognition, 1
Multiconfiguration SCF approach
Main group atoms in the multiconfiguration SCF approach, 11
Multistability
Informative energetic structure and electronic multistability of condensed state, 125

$N^+ + H_2 \rightarrow NH^+ + H$ reaction
A diatomics-in-molecules study of the re-

action $N^+ + H_2 \rightarrow NH^+ + H$, 219

Organometallics
Calculation and visualization of a reactivity index for organometallics based on the extended Hückel model, 175

Polar medium
Influence of polar medium on the anomeric effect. Quantum chemical study using the ab initio continuum model, 285
Pseudopotential calculations
Simple Gaussian-type *d* and *f* polarization functions in pseudopotential calculations, 87
Pt(II)
Rehybridization in ethene ligand of Pt(II) in Zeise's anion, 305

Reactivity index
Calculation and visualization of a reactivity index for organometallics based on the extended Hückel model, 175
Reagent rotation
Effect of reagent rotation on the dynamics of the $H + DBr \rightarrow HD + Br$ reaction, 241
Reduced graph model
The reduced graph model revisited, 79
Relaxation phenomena
Lipid phase transition and relaxation phenomena, 147
Ring inversion
The bicyclobutane radical cation revisited: electronic structure and mechanism of ring inversion, 249

SH_3^+
Quantum-chemical studies of the modification of the inversion-reaction pathway in SH_3^+ by substitution of hydrogen atoms with lithium atoms, 187
Shape and similarity
Shape and similarity: two aspects of molecular recognition, 1
Site–site representation
An examination of the site–site representation of the He–H_2 and He–N_2 potentials, 193
Spatial symmetry
Integral transformation on microcomputers utilizing the spatial symmetry of localized orbitals, 93
Structure–activity relationship
A molecular-orbital study of the structure–activity relationships of some imidazolidines related to clonidine, 327

Thialene and isothialene
Magnetic circular dichroism of cyclic π-electron system Part 30. Thialene and isothialene, 351

Zeise's anion
Rehybridization in ethene ligand of Pt(II) in Zeise's anion, 305
